2035TH AACS SQUADRON  
1801ST AIRWAYS AND AIR COMMUNICATIONS SERVICE GROUP  
Nellis AF Base, Nevada

19 Nov 55

STATEMENT OF TOWER OPERATOR

I, Alfred Arneho, heard several transmissions over Very High Frequency (126.18 mcs) receiver from AF 9068 C-54 between 0730-0800 hours PST. Said aircraft first called Water Town Tower for five (5) minutes then attempted contacting Indian Springs Tower. When said aircraft called Indian Springs Tower for the first time I did not answer its call mainly because I assumed that Indian Springs Tower heard the aircraft and was transmitting to it. But approximately five (5) minutes later, I again heard the aircraft attempting contact with Indian Springs. At this time, air traffic at Nellis was becoming congested which prevented me from calling AF 9068. Approximately half an hour later I called the Tower at Indian Springs and asked if they heard AF 9068 calling them. They gave a negative reply.

I swear that the above statement is true to the best of my knowledge.
